Streamlined pool enclosure OPERA	10
Asymmetric pool enclosure ELEGANCE	11
Spacious pool enclosure PRESTIGE	12
Combined pool enclosure ATLANTIS	13
Huge pool enclosure CRYSTAL	14
Options and equipment	15-16
Motorization	17
INFINITY guide rails	18

ALUABRI

ALUABRI is a modern production of pool enclosures, including an automated powder coating line. Technological CNC machines allow the production of high-quality pool enclosures in a short time.

WE ONLY PRODUCE POOL ENCLOSURES

SNOW LOAD CALCULATION

ALUABRI engineers develop profiles and profile systems taking into account local requirements and loads. Each pool enclosure is calculated for the snow load. We have five existing profile systems and optimal selection for each case.

 aluabri.com

ALUABRI

ALUABRI continuously improves its product and reinvents many of the pool enclosure components. In 2021, we invented and patented 3 mm guide rail. It is installed in the construction of the floor around the pool.

DEVELOPMENTS AND INNOVATIONS

DELIVERIES AROUND THE WORLD

We supply pool enclosures to Israel, Scandinavia, EU and CIS countries. Deliveries are carried out both assembled and unassembled pool enclosures. With each product, the client receives instructions for assembly and user's manual.

 aluabri.com

ALUABRI

We produce safe and aesthetic pool enclosures. Child safety is given a lot of attention. A child under 5 years old will not be able to open our pool enclosure on their own. It does not have a single sharp edge or visible fastener to scratch on it.

CHILD SAFETY

ATTENTION TO DETAILS

We produce comfortable pool enclosures. Even those nodes that are not visible at first glance are worked out to the smallest detail. ALUABRI pool enclosures do not require maintenance and bring pleasure to use for many years. We use only stainless fasteners and bearings, only high-quality Italian fittings Elessa, only premium powder paint Tiger Coatings.

 aluabri.com

ALUABRI

ALUABRI uses only premium European polycarbonate for its pool enclosures made in Sweden and Czech Republic. Monolithic polycarbonate 4 mm thick, cellular - 8 mm. The ends of cellular polycarbonate are covered with AntiDust membrane, which prevents the formation of mold and mildew in the cells.

POLYCARBONATE

ABRIS popular low pool enclosure

Abris is a low and functional pool enclosure with an affordable price. It allows you to close the pool with a low arch without blocking the views of the courtyard. It shaped of variable radius.

Profile system S43

CRYSTAL

Side doors

1

Side sliding door can be mounted in a larger segment of the pool enclosure. The sliding door moves directly along the larger segment. This allows a comfortable entrance even in a low height pool enclosure and swim under it in any weather.

Locks and security

2

Our pool enclosures are equipped with a system of locks and special latches for the safety of children under 5 years old. It's made in accordance with European standards. Doors have special locks with a key. To open latches on segments you have to make two different movements at same time.

Polycarbonate

3

For our pool enclosures we use polycarbonate from well-known European manufacturers ARLA, MARLON, MAKROLON.

Cellular polycarbonate 8 mm and solid - 4mm with UV protection and 10 year warranty. In the construction of pool enclosures it can be combined.

Doors and windows

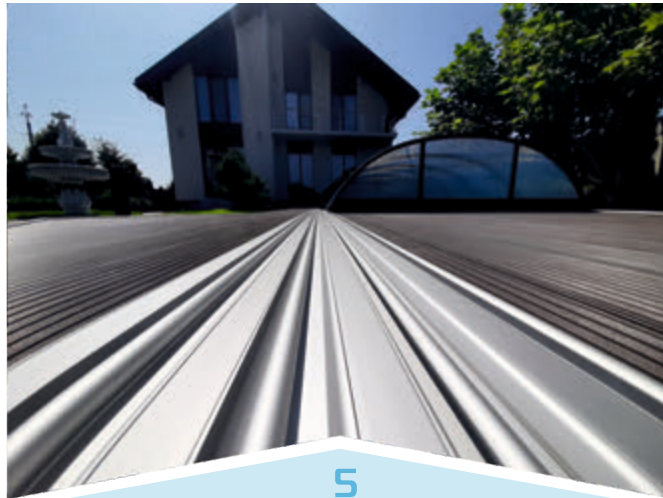

4

Doors and windows can be installed in the gable wall of the pool enclosure by an individual order. It allows the pool enclosure to be moved over the installed additional pool equipment above the ground during its movement.

Guide rails

5

The guide rails of our pool enclosure do not have visible fasteners - everything is covered with a decorative cover profile. The ends of the rails are protected and safe for the feet. The rails are designed in such a way to keep the pool enclosure from wind load. The rails have a thickness of 15 mm to 18 mm depending on the profile system.

Profile color

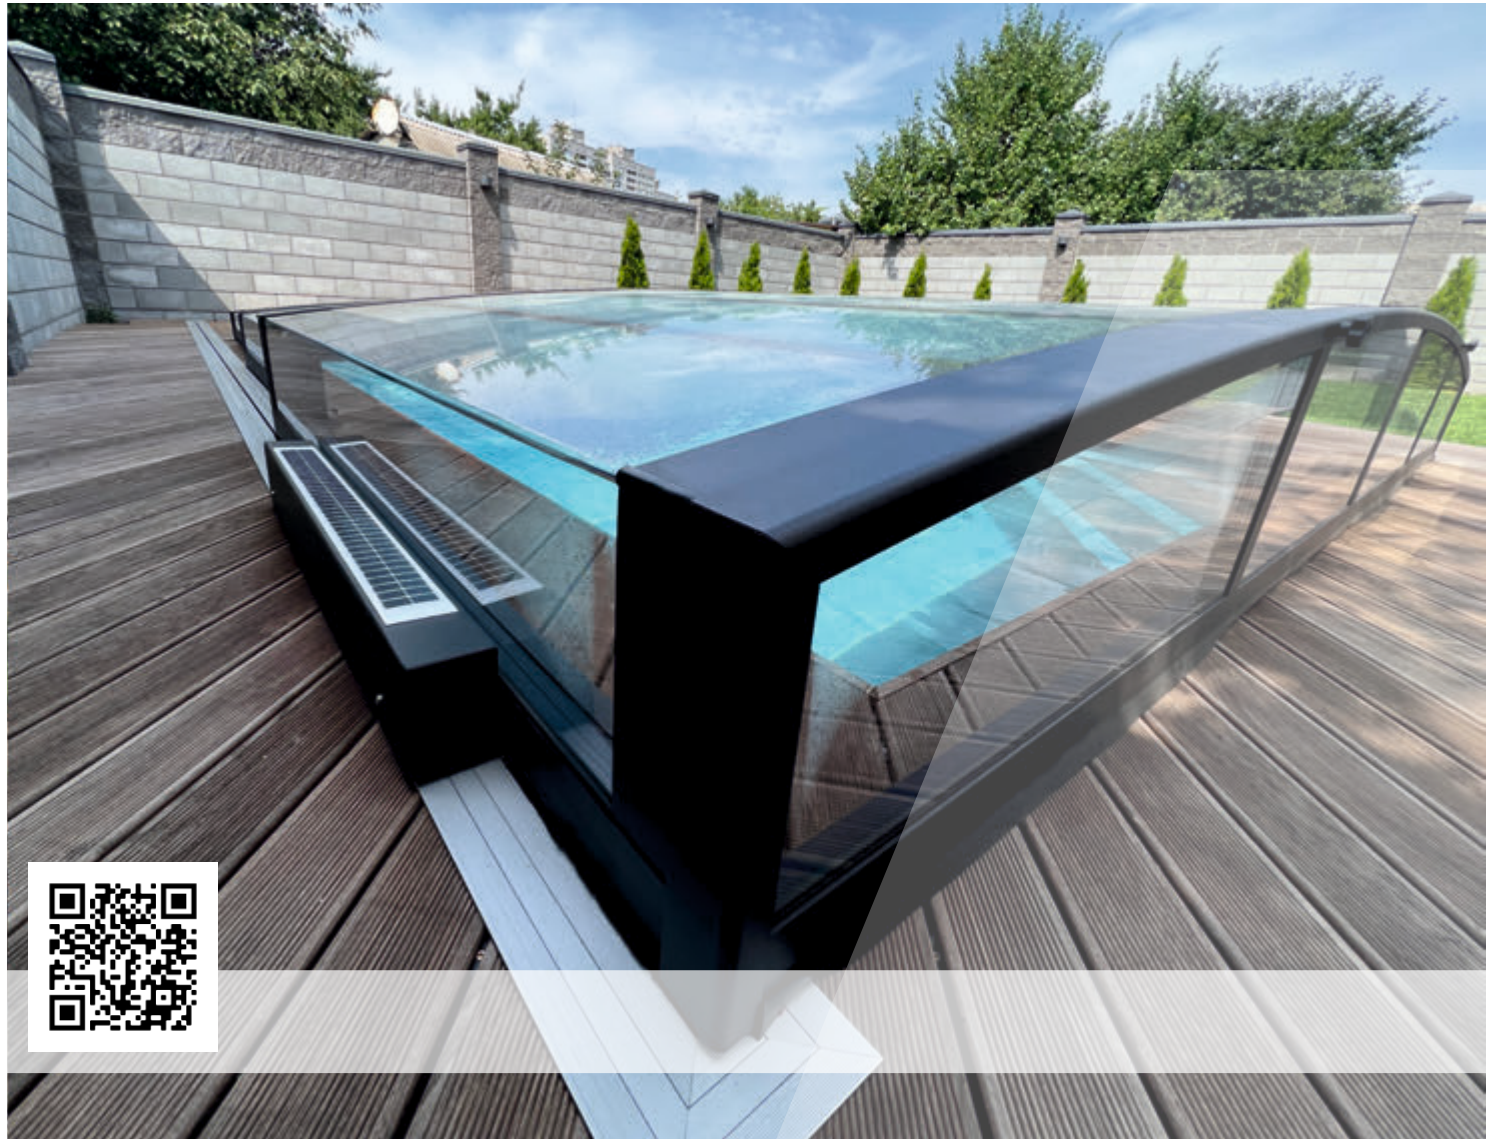

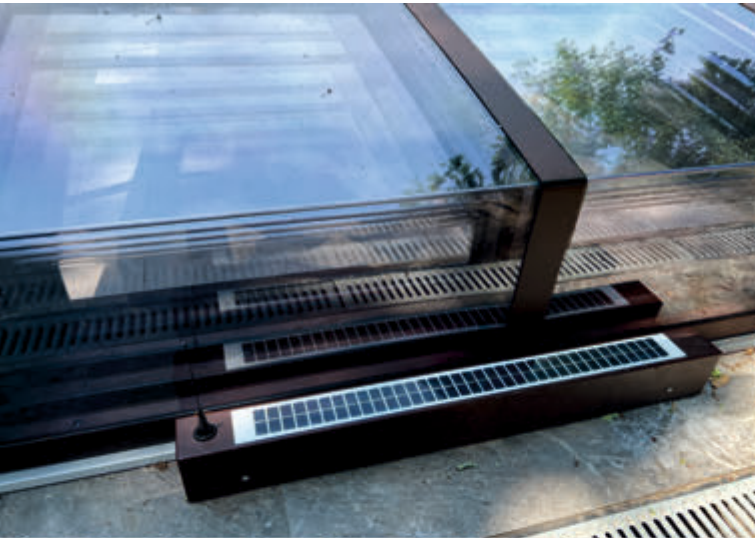

6

Our powder coating line allows to paint the profile of pool enclosures with high quality. For painting, we use only the highest quality paint from the Austrian brand Tiger Coatings. Profiles can be painted in one of the standard or non-standard colors by RAL or make a wood grain texture.

MOTORIZATION

Motorization allows you to control the movement of the pool enclosure using a remote control or an application in a smartphone with iOS or Android. Motorization is completely autonomous. The 12 V battery that feeds the motor is charged by a solar panel mounted on the motorization body. It is a pleasure to move the pool enclosure with ALAUBRI motorization.

INFINITY RAILS

The Infinity guide rails are only 3 mm high patented by ALUABRI.

Best for installation on the wooden terrace decking. The rails are part of the floor structure. Therefore, their installation should be provided at the design stage. Absolutely safe for feet. It doesn't not create obstacles. The hole between the guides is only 7 mm, which prevents injuries even for small children.
